

# Appendix H: Native American or Indigenous Research

A project includes Native American or Indigenous research participants when:

- The research takes place in Indian Country, and/or on land under the control or jurisdiction of a sovereign tribe or among International Indigenous populations; or
- Human research is conducted in Indian Health Service (IHS) facilities or involving IHS staff or resources, or
- The research involves participation by members of a sovereign tribe or Indigenous community and that may foreseeably result in research results with implications specific to a tribe or to individuals as members of a tribe or Indigenous community, and the proposed publication or dissemination of that research; or
- The research actively recruits Native Americans or International Indigenous populations for enrollment or participation; or
- The research involves human subjects, including genetic testing or testing of blood, tissue, or other biological materials if the individual's membership in or affiliation with a tribe or Indigenous community is identified, and that is intended to or that may foreseeably result in conclusions or generalizations about a tribe or individuals as members of a tribe or Indigenous community.
